Code/Category:	

USDOT 3102535 ID VIN DD184837   3102535

## OCR Engine
Fast, accurate and easy to use
Captures DOT codes at speed

Standards
Recognition of FMCSA USDOT IDs

Platforms
Runs on standard PCs or embedded in Axis cameras with ARTPEC-6/7 chipsets

Video Input
Works with live video or still images

PC version accepts ONVIF compatible RTSP streams and is compatible with most major CCTV camera brands

Back Office
VAX-OCR-DOT sends data to the powerful Helix BOF which can sound alarms etc. or via TCP/IP,HTTP-POST XML, JSON, or via .CSV etc. to many other 3rd party BOFS

VMS Compatibility
VAX-OCR-DOT can also send real time data to many VMS systems including: Milestone, Genetec, Pelco, March, Exacq etc.

VAX-OCR-USDOT is software for the recognition of US Department of Transport identification marks. Companies that operate commercial vehicles transporting passengers or hauling cargo in interstate commerce must be registered with the FMCSA and must have a USDOT Number. Also, commercial intrastate hazardous materials carriers who haul types and quantities requiring a safety permit must register for a USDOT Number.

The USDOT number serves as a unique identifier when collecting and monitoring a company's safety information acquired during audits, compliance reviews, crash investigations and inspections.

The OCR Engine for the USDOT ID recognition codes is 100% proprietary and can be plugged into VaxALPR taking advantage of current integration and reporting capabilities offered by VaxALPR series products including Milestone & Genetec VMS and many more.

VAX-OCR-DOT Recognition software is currently available on 2 platforms:
- *Embedded in AXIS cameras with ARTPEC 6/7*
- *PC Platform*
