Video Input

Works from both video stream and still images.
PC version compatible with major camera brands:
Axis, Pelco & Basler.

VAX-OCR-PLANE is software for the recognition of plane IDs. The ID comprises the country call sign prefix and registration suffix. The OCR Engine for the plane ID recognition codes is 100% proprietary and can be plugged into VaxALPR User Interfaces taking the advantage of current integration and reporting capabilities offered by VaxALPR series products.

VAX-OCR-PLANE Plane ID Recognition software is available in 2 platforms:

- Embedded in AXIS camera processor
- PC Platform
